PROJECTS

Square Signs Armenia (02/2022 - 04/2023)
- As a Front-end Developer for Square Signs, I worked with a modern and feature-rich tech stack to build an innovative online sign making and printing platform.We also utilized APIs and integrated with external services for payment processing and order fulfillment. With this stack, we were able to create a seamless user experience, allowing individuals and small to medium businesses to easily customize and order personalized sign displays.

HR Tool (02/2021 - 01/2022)
- I started work in office product HR tool in which contain all information about office and staff and this is easy to work with hr because in example people who want to apply our job position sign in and after office see all infromation about candidate and so on

Online Shop (03/2019 - 01/2021)
- The online shop consists of a product listing page, individual product pages, a shopping cart, and a checkout page. I utilized ReactJS and Redux for state management, React Router for navigation, and integrated the online shop with an API to retrieve product information, pricing, and availability.
